GULF COAST · SELF-PERFORMING · SINCE 2010

# Underground Utility & Fiber-Optic Construction

AMS Utilities is a family-run underground and fiber-optic construction contractor serving the Gulf Coast and Southeast. Five field crews self-perform the full scope of a buried-infrastructure job — bore, trench, conduit, and pull — with our own crews and owned fleet, for the utilities, telecoms, and contractors who build the region's networks.

## CORE CAPABILITIES

- Underground Fiber & Cable Placement
- Directional Boring / HDD
- Conduit, Duct & Innerduct
- Trenching & Excavation
- Vibratory Plowing
- Vault, Handhole & Pedestal

## WHY PRIMES CHOOSE AMS

- **Self-performs the core scope** — one accountable contractor for the bore-to-pull sequence, not a chain of subcontractors.
- **Owns its fleet** — 4 directional drills, 2 vacuum trucks, 3 excavators, and 2 plows ready to mobilize.
- **Five field crews (~30 employees)** and scales capacity with vetted subcontractors when a build demands it.
- **Delivers full-scope jobs** — bore, trench, place conduit, and pull fiber as a single coordinated build.

## COMPANY DATA

LEGAL NAME	Alliance Mechanical Solutions, LLC (DBA AMS Utilities)
FOUNDED	2010 · Family-owned & operated
NAICS	237130 — Power & Communication Line & Related Structures Construction
INSURANCE	General Liability · Workers' Compensation
